their crunches wrongly too.

Think about it. Why is the exercise called the crunch. It is because you must squeeze your abs so are that you are crunching them. In order to squeeze your abs hard, you have to curl up like a prawn and breath out all the air in your lungs at the top position and then squeeeeeeze the muscles so hard that you feel a burn. That will take a few seconds to crunch out all the air before you lower to the beginning position again. You cant do this effectively if you just go up, down, up down, up down rhythmetically. So, if you have been doing hundreds of crunches everyday with minimal result, now you know why. In fact, it is almost impossible for the average guy to do tens of properly performed crunches and not to say hundreds of them. The same squeezing principle applies to other abs exercises. 7 If high odds and high risk is not what you are looking for you can take advantage of the late night satellite tournaments.
