The answer is this The skin is composed of its own hardworking ingredients that help keep it looking young and healthy.

Unfortunately, with time, these ingredients slowly diminish and the barriers against the environment and aging break down, resulting in the effect of fine lines and wrinkles. It then becomes harder for the skin to fight new wrinkles and existing wrinkles become more visible. Coenzyme Q10 and creatine are two perfect examples of this. Both are found naturally in the skin and are responsible for keeping skin looking young and healthy. However, they too deplete with time. Thankfully, a line of products is available that effectively replaces these two essential ingredients.
